Proposal 1

Chosen proposal

1. Organisation Overview

Name:

Oak & steam

Brief History:

Oak & Steam Café is a locally owned café which launched in 2019 Pretoria, South Africa. It was created by two friends who were passionate about quality coffee, handmade teas, and freshly baked treats. What started off as a small local coffee shop has grown into a friendly community space where people gather to relax, work, study, or catch up with friends. The café is famous for its warm atmosphere, friendly service, and dedication to use fresh, locally sourced ingredients whenever possible.

Vision Statement:

To become the most popular café in South Africa by building deep connections with high-quality coffee, handmade drinks, and freshly baked goods in a warm environment.

Mission Statement

Our goal is to provide a welcoming environment where each visitor feels at home while serving fine coffee, unique teas, and fresh baked treats produced with quality ingredients. We are dedicated to encouraging a healthy environment, assisting local suppliers, and creating lasting connections within our community.

Target Audience

- ❖ University students and college students looking for a quiet place to study or hang out with pals.
- ❖ Families looking for a relaxing weekend breakfast or afternoon tea,
- ❖ Coffee and tea lovers who appreciate high quality coffee , enjoy herbal tea and handmade brewing methods.
- ❖ Local residents and tourists looking for light café meals, cakes, cookies, and freshly made goodies in a friendly setting.

2. Website Goals and objectives:

Specific Goals:

The main purpose of the Oak and Steam Café website is to establish a user-friendly and attractive website where our customers can look through our menu, learn about the café, and find important information before visiting.

1. **Creating brand awareness** - By creating a website for Oak and Steam, we are bringing our café to the attention of both new and current clients.
2. **Displaying of the menu** –By giving customers a clear menu, they can look at the different coffee, tea, and baked goods that are available, along with prices and explanations as needed.
3. **Increasing customer visits and encourage customer interaction** - The website will provide useful details like the café's location and contact information, which will encourage customers to visit the actual café and ask questions.

Key Performance Indicators:

4. **Site Traffic** – Caldwell(2022) asserts that's site traffic is the total quantity of visits to a website in a specified period. More visits lead to more purchases/reservation
5. **Mobile Site Traffic** – Caldwell(2022) asserts that it tracks the number of visitors who visit your website. By segmenting site traffic by mobile and desktop, business can analyse customer experience to ensure it converts as well as the full desktop experience.
6. **Traffic Source**– Caldwell(2022) asserts that traffic source specifies how online visitors found our website.

3. Website Analysis

Strength and weaknesses

1.Strengths:

- The present website, Oak and Steam, has a very unique name and identity.
- It sells a range of products, such as tea, coffee, and baked goods.
- Some information about the café is provided to customers.

2.Weaknesses:

- There isn't much information about the café and its goods on the website.
- The menu is not presented in an organized or clear way.
- The photos on websites are not very good.
- Lack of important details including proper contact information, operating hours, and location

Area of improvement:

Weaknesses	Improvements
There isn't much information about the café and its products on the website.	Add a clear About Us section with the café's history, vision, mission, and information about its products
The menu is not organized and presented in a way that is clear.	Create a well organised product section which separates coffee, tea and baked goods
The quality of the photographs on websites is poor.	Replace existing images with h quality and clear images of the café's products
Important details like the address, contact information, and opening hours are missing from the website.	Add a clear and detailed Contact Us section with valid phone numbers, email address, location and working hour

4. Proposed Website features and functionality:

Essential features and desired functionality

1. **Navigation Bar**

- Links to Home, About Us, Products, Enquiry, and Contact.
- Makes it easy for customers to move through sections.
- Navigation is simple and the same across the website.

2. **Home Page**

- Introduces Oak and Steam Café with a short and welcoming text
- Includes a short description of what the café offers.
- Provides a see menu section which links with the products

3. **About Us Page**

- Provides information about the café's history, vision, and mission.
- Explains what makes Oak & Steam Café different.
- Includes a "**Why Choose Us**" section.

4. **Product Page**

- Displays the café's products in an ordered way.
- Separates products into categories such as coffee, tea, cookies and doughnuts.
- Includes product names, images, short descriptions, and prices.

5. **Enquiry Page**

- offers a simple form where customers can make enquiries.
- Includes fields such as name, phone number, email, and message.
- Includes a submit button.
- shows frequently asked questions to help customers find quick answers

6. **Contact Page**

- Provides important contact information such as Phone number, WhatsApp, Email address, Physical location, Opening hours
- Makes it easy for customers to get in touch with the café.

7.Footer

- Appears at the bottom of each page.
- Contains important links and basic café information.
- Includes social media links and navigation links.

8. Reservation Page

- Offers a simple form for customers to make reservations bookings.
- Includes fields such as name, phone number, email, and message.
- Includes a submit button.

5.Design and user experience

Colour Scheme:

(Coolors, 2026)

The colour scheme will have a warm, earthy, and slightly vintage design, inspired by the oak, coffee, baked products, and peaceful café. The use of this color scheme gives the website a more modern, comfortable, and café-like look and feel.

Typography

Aa Playfair Display (Google fonts, 2026)

The use of this font will bring about class, elegance and a sense of vintage style, giving the website an expensive vibe. Used for headings

Aa Lora (Google fonts, 2026)

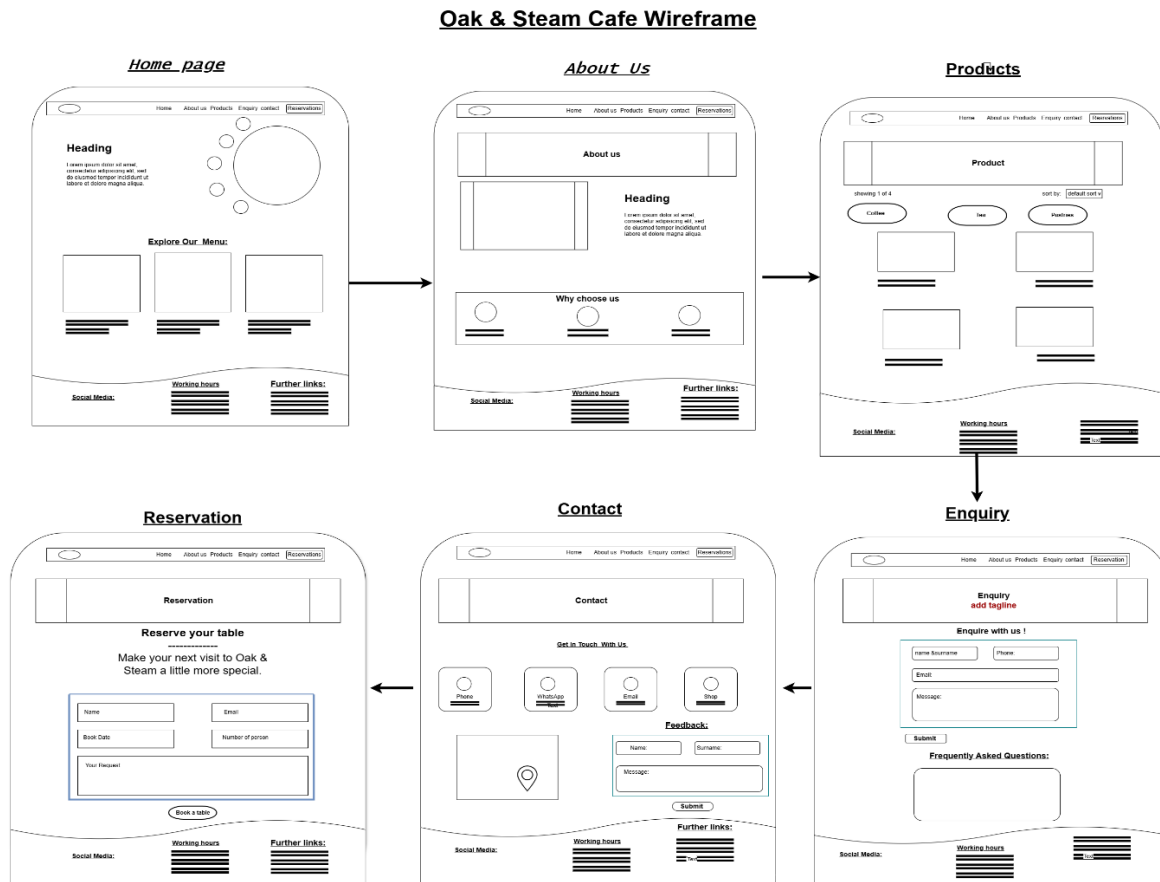

This font is very easy to read, also its warm and is works nicely with the café's look. Used for texts, paragraphs and descriptions.

Aa Montserrat (Google fonts, 2026)

This font has a clean and modern look to it and will be used for the navigation bar as it will make it easy to move through.

Layout & Design

Wireframe: (draw.io, 2026)

The wireframe of Oak and Steam works in this way:

Home page – Introduces Oak & Steam Café with a heading and a short description and an “Explore our menu” section which shows a portion of the café’s products.

About Us- Gives information about the café, which includes why customers should choose Oak & Steam.

Products- shows the café’s products in a category coffee, tea, cookies and doughnuts, where customers can see the different products.

Enquiry- Allows for to send an enquiry by filling in their name, phone number, email and message. This section also includes a FAQ section

Contact- Shows different ways to get in touch with the café , phone number, email and location.

Reservation- Allows customers to book a table by entering their details, preferred date, number of person and any requests

Footer- All pages have the café's social media, working hours and additional links

6. Technical Requirements:

Oak & Steam Café will be hosted using Afrihost shared linux hosting, which is suitable for a small business website and provide features needed to host and manage the website (Afrihost, 2026). The domain name is (.co.za). The website will be developed using HTML, CSS, JavaScript, with bootstrap as a support for responsive design.

7. Timeline and Milestones

Dates	Tasks	Deliverable
10–14 Aug	Complete research, Organisational overview, target audience, goals, KPIs, existing website analysis, colour scheme, fonts, layout and technical requirements.	Part 1 Proposal – Friday, 14 Aug
	Create the website structure and basic HTML pages. Set up navigation, homepage, About Us, Products, Enquiry and Contact sections.	Basic website structure

Proposal 2

Organisation Overview

Name:

From Our Garden

Brief History:

From Our Garden is a small local floral shop established in 2016, by a flower lover who's motive was to make beautiful, affordable bouquets for everyday moments. From our garden started of as small home based business over time through word of mouth and local support. Now From Our Garden creates fresh bouquets and floral arrangements for birthdays, celebrations, weddings and special occasions.

Vision Statement

Bringing beauty and joy into people's everyday lives through fresh and arranged flowers.

Mission Statement

Our mission is to provide flowers that are fresh , beautiful and friendly service while creating bouquets that make every occasion feel special. Our aim is to offer quality flowers at an affordable prices and make choosing the perfect bouquet simple and enjoyable.

Target Audience

From Our Garden targets , young adults looking for birthdays , anniversaries and gifts. Couples buying flowers for romantic occasions. Families and friends looking for flowers for celebrations and special moments. Wedding clients who need bouquets and floral decorations.

2. Website Goals and Objectives

goals

The website's main goal is to increase the number of individuals who learn about From Our Garden and help customer viewing and ordering of bouquets.

The website must:

Show the different bouquets that are available.

Inform customers about the company.

Make it simple for clients to get in touch with the store.

Allow customers to order a bouquet or make an inquiry.

Shows the shop's address and phone number.

Key Performance Indicators (KPIs)

- Number of people visiting the website.
- Number of bouquet enquiries.
- Number of customers contacting the shop.
- Number of people viewing the bouquet page.
- Number of orders received through the website.

3. Current Website Analysis

Strength and weaknesses

Since From our Garden doesn't have a website it is difficult for customers to search online and view the available bouquets, the firm may lose potential clients.

Areas for Improvement

The new website will help by:

- Giving the business an online presence.
- Showing photos of the bouquets.
- Making contact information easy to find.

4. Proposed Website Features and Functionality

- Homepage

The homepage will introduce From Our Garden and show a nice picture of flowers. It will also have a short message about the business and a button to view the bouquets.

- **About Us Page**

This page will tell customers about the business, its history and what makes From Our Garden special.

- **Product Page**

Bouquet name.

Photo.

Short description.

Price.

Order or enquire button.

- **Contact Page**

contact page will include:

Phone number.

Email address.

Social media links.

Business location.

Contact form.

- **Enquiry Page**

Customers will be able to send an enquiry about a bouquet they would like to order.

They can provide their name, contact details and what type of flowers they are interested in.

- **Navigation**

The website will feature a straightforward navigation bar with links for Home, About Us, Bouquets, and Contact, facilitating easy movement between pages for users.

5. Design and User Experience

The website should have a calm, natural and pretty look because the business is about flowers and nature.

Colour Scheme

The colour palette will be created using Coolors, which is a website that can be used to create and explore colour palettes (Coolors, 2026).

These colours were chosen because they remind people of flowers, plants, nature and a garden.

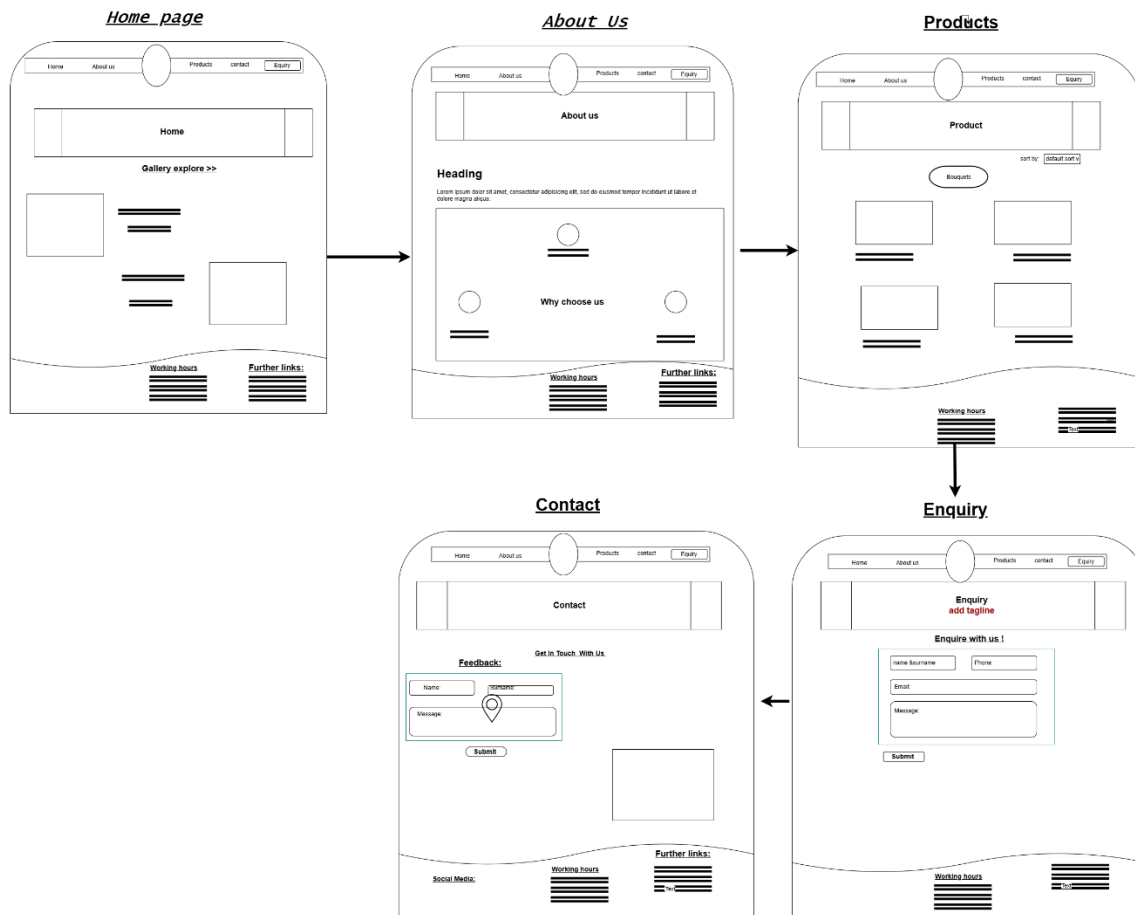

Typography

The website will use simple fonts that are easy to read.

Wireframe

Oak & Steam Cafe Wireframe

6. Technical Requirements

Programming Languages

- HTML – for the structure of the website.
- CSS – for the design and layout.
- JavaScript – for interactive features.

Hosting

website will be hosted using **Afrihost**. Afrihost offers shared Linux hosting starting from about **R84 per month**, which is suitable for a small business website. Their shared hosting packages also include features such as website storage, email accounts and a free domain for some domain types(.com) (Afrihost, 2026).

7. Timeline and Milestones

week	task
1	Research the business and plan the website
2	Create the colour scheme and wireframes
3	Create the HTML pages
4	Add CSS and design the website
5	Add JavaScript and interactive features
6	Test the website on different screen sizes
7	Test the website on different screen sizes
8	Publish the website and complete the project

8. Budget

The budget is based on a small local business website.

Estimated Cost	Estimated Cost
Website development	R2 500
Domain and hosting	About R1 008 per year
Website maintenance	R500 per month
Design resources	R0 – R300
Estimated first-year cost	+/- R10 000
